### SUMMARY

---

Five years of experience as a Software Development Engineer, Software System Test Engineer, and Full Stack Developer in all phases of Software Design, Development, Test, and Documentation. Enjoy the challenge of developing and testing software. Versatile, very motivated, specializing in coming up to speed quickly and becoming a profitable team member. Skilled at listening and gathering information needed to solve problems. Excited to embrace new software challenges after taking a sabbatical to pursue other passions.

---

### SOFTWARE ENGINEERING EXPERIENCE

---

UNC FULL STACK CODING BOOTCAMP, *CHAPEL HILL, NC*

*6 months*

- Full-Stack Web Development with a deep dive in HTML5, CSS3, JavaScript, Bootstrap, Materialize, jQuery, Firebase, AJAX, Web APIs, Node.js, Express.js, React, MongoDB, MYSQL, MVC, Handlebars, Git Workflow, Agile, Heroku, Trello
- Project: Full Stack Employee Management and Scheduling App – MERN Full Stack App that allows managers to manage employee data and schedule employees and allows employees to view their work schedule and the latest announcements from management. React, React Router, Node.js, Express.js, Babel, Webpack, MongoDB, Passport Authentication including Google and LinkedIn login, NPM packages, Agile, Trello, and Balsamiq used. Github – <https://github.com/clsavino/react-shift-scheduler>, Deployed using Heroku - <https://reactschedulr.herokuapp.com/>
- Project: Full Stack Nonprofit Website Proposal – Software Project Manager for the redesign of an outdated website for a local nonprofit. Added backend database for Administration to manage Meals on Wheels schedule, Donor events, and Volunteer information via new user authenticated admin pages. Redesigned website using Agile 2-week Sprint Methodologies. Balsamiq Wireframe Mockup used to design 10 pages. Using MVP ideology and small user stories, created a Trello board to manage the team's workflow. Responsible for website architecture, frontend design, and server routes using Node.js, Express.js and a variety of NPM packages. Used MVC file system with Handlebars, MySQL, Sequelize. Open Source Project on GitHub <https://github.com/clsavino/sequelize-nonprofit-web-app> Deployed using Heroku - <https://nonprofit-web-app.herokuapp.com/>
- Project: Good News! – Front End Web App using Firebase Client-Side Storage for user feedback and Client-Side email via the MailChimp API. Visually compelling UI/UX using catchy and soothing Flat UI color palette. Data-rich application that draws feel-good news stories using Reddit API and cute photos from the Flickr API. HTML5, CSS3, JavaScript, jQuery, Bootstrap, AJAX, Flickr API, Reddit API, MailChimp API, Firebase, GitHub, Heroku, Trello, Balsamiq. GitHub - <https://github.com/clsavino/GoodNewsAPISearch> Heroku - <https://good-news-app.herokuapp.com/>
